*GIORNATE CARDIOLOGICHE TORINESI* have now become a landmark event in the landscape of Italian cardiology, a meeting place where clinical experience, cutting-edge research and future visions of cardiovascular medicine are shared.

This year's edition stands out for the **exceptional participation of twenty international experts from prestigious European academic centers**, who will bring highly scientific contributions and offer a privileged perspective on the latest innovations in prevention, imaging, advanced therapies and artificial intelligence applied to cardiology. Among them are also the presidents of scientific societies such as ESC, SIC, and ANMCO.

Particularly noteworthy is **the official session held under the aegis of the European Heart Academy of the ESC**, a testament to the institutional recognition and international dimension the Congress has now achieved.

The program confirms the strategic role of Turin and the Congress as a hub for dialogue and exchange among different schools and areas of expertise. All this has been made possible thanks to the **solid and dynamic network built by the professionals of Piedmont**, who have successfully combined expertise, relationships, and a collaborative spirit, creating a program of extraordinary scientific and cultural value, capable of projecting the **GIORNATE CARDIOLOGICHE TORINESI** into the heart of the European cardiovascular debate.
